CSIS 1280 Web Development
Project Guidelines

Specifications:
1. You are required to create a three-pages website if you work alone, four pages if there is only two of you and a six pages website if you work in a team of three or four. The maximum number in a group should be four.
2. The topic for your website should be approved by the professor.
3. This is YOUR project and you are NOT ALLOWED to copy either the web pages (HTML, CSS or JavaScript codes) or contents from others.
4. If you are using content from other sources, proper references MUST be provided.
5. You are NOT ALLOWED to use any HTML/CSS framework such as BOOTSTRAP.
6. You are going to present your project in the class at the designated time.
7. Aside from your website, you are going to submit the project log report.

Marking Criteria (15% of overall grade):
- Originality
- Navigation
- Completeness
- Graphics and multimedia
- CSS and layout design
- Ease of navigation
- Look and feel of the website
- Java Script
- Appropriateness of content
- Coding standard and cleanliness
- Proper documentation
- Presentation
- HTML and CSS Coding

Project log (as part of the project)
- If you are working in a group of two, each of you are required to submit your own project log. You MUST indicate clearly the work that you have done and which part of the web pages you are responsible for.
- You should document all changes that you made on the web pages and work done since the submission of last project log.
- You are required to write a Summary section at the end of the project log to highlight
  o the initial and final design of the web pages
  o the main HTML/JavaScript/CSS3 features that you used
  o any features/tools that are not covered in class but have been applied in the project
